

Policy: Chemical and Petroleum Spill Response
Responsible for Policy: Environmental Health & Safety
Governance Body Oversight: College Council
Date of Last Review: January 2022

Policy Number: 4
Most recent approval date: April 2022

Policy Statement

Finger Lakes Community College at L
related to spill management.

Reason for Policy

Spills and discharges of chemicals, including petroleum products, have the potential to harm human health and the environment if appropriate procedures are not implemented as soon as possible. This policy has been created to ensure that personnel who work with chemicals, including those in the laboratory, have the appropriate procedures to implement in the event of a spill.

Applicability of the Policy

petroleum.
